

# Employee Management System

THATIPELLI SUJITH KUMAR REDDY

25-08-2021

## Overview

Our goal in this project is to provide the user an easy way to manage the employee details. In this website, the administrator have privileges to add employee personal, travel, loan, leave and health details.

## Objective

1. To make the user use the website interface to manage employee details.
2. To control employee data and minimize complexity.
3. To store updated information of employees.

## Tech Stack

1. Front-end: HTML5, CSS3, JavaScript.
2. IDE / Text Editor: Visual Studio Code.
3. Version Control: Git.
4. Operating System: Ubuntu 20.04

## Browser

1. Google Chrome
2. Firefox
3. Safari

## Users

1. Admin
2. Managers
3. Employee
