

-: SCHOOL WEBSITE :-

Dt-28 aug 2021

Manas ranjan sahuo

Introduction

Now a days education plays a great role in devlopment of any country.Many of educations organizations try to increase education quality.One of the aspects of this improvement is managing of school resources.For students they can view their subject's grade,contact with the headmaster and teachers for any complaint,recommendation or an absence permission,and they also up to date with all school's news or posts.Our major tool through this managing process by making a continuous communication between headmaster,teacher's,parents and student.For Teachers,they can add student's grades or edit it for their own subjects only and they have a direct students and their

parents. For parents, they have an access for their sons/daughters grades without any possibility to edit on it, and they can directly contact with teachers and headmasters.

Objectives

- 1) To build a responsive website to manage the different school activities.
- 2) To track student's grades from their parents.
- 3) To facilitate distribution process of courses and classes for teachers.
- 4) To facilitate grades entry process for students by teacher and also make a virtual community between the members.

System Users

1. Management
2. Teacher
3. Student
4. Parent

Management Features
